## Direct Intraoral Scanning

### Medit Link Software

#### **The Future of Digital Dentistry: A Collaboration Tool for Dental Clinics, Denturists and Labs**

With the advent of digital technology, collaboration between dental labs, dentists and denturists has never been easier.

#### **Working Together is Better**

Medit Link is a collaborative tool that facilitates communication between dentists, denturists and labs to support patient-centered digital dentistry workflows. Its integrated cloud storage and open data architecture ensures that your performance is optimized while supporting your everyday CAD processes with its real-time workflow management and communication tools.

## Cloud Storage

Cloud storage is becoming a necessity as files and information go digital. That is why Medit Link is packaged with cloud storage which provides you with the ideal storage space for all your patients' files. You can save both digital impressions and patient treatment information securely on the cloud. Medit Link facilitates automatic uploading and downloading of databases and files via Amazon's AWS. Data is automatically synchronized from the PCs of multiple users within the same company; technicians can work conveniently from any PC where Medit Link software is installed.

## Medit Link and the DIOS 4.0

Medit Link helps you manage DIOS 4.0 scan data and order prostheses. Medit Link generates information related to the scan, allowing the DIOS 4.0 to scan properly. Once the scan is complete, Medit Link automatically uploads the scan file to the cloud and facilitates ordering and payment to contracted laboratories.

## Workflow Management

Dentists and denturists can easily order prostheses based on data generated by Medit Link. Clinics can also communicate about items and prices with dental labs through contract services provided by Medit Link. Medit Link allows tracking of workflows from order to delivery and can even be linked to CAD/CAM software to improve work efficiency. This collaboration tool was created to help you manage your workflow in the easiest and most effective way possible, saving you valuable time.

## Fueling Growth Initiatives

Medit Link makes workflows more reliable, flexible, and scalable. It helps improving communication and makes sense of massive amounts of data. Above all, our technology expands to fit your business needs, increasing speed and efficiency. With our collaboration tool for digital dentistry you can stay focused on your important tasks as Medit Link provides you a convenient overview of all your current digital processes.

## 3D Viewer

After completing the scanning process in the DIOS 4.0 scan software, you can preview the final image via the 3D viewer in Medit Link.
